CentraCare Health and Coborn's, Inc. expand quickClinic concept in Sauk Centre and Sartell locations

St. Cloud, Minn. – Coborn's, Inc., and CentraCare Health have expanded their partnership to provide greater access to health care for people living across Central Minnesota through quickClinics which provide convenient and low-cost care options within grocery stores.

The newly opened quickClinics are located at 214 12th Street South in Sauk Centre and at 1725 Pine Cone Road South in Sartell. Both clinics are open from 7 a.m. to 7 p.m. daily including most holidays.

These clinics are the third and fourth locations to open. The first quickClinic opened in Waite Park at Cash Wise in November 2017 followed by the Coborn's store in Foley in January 2018.

"We're continually looking for innovative ways to help our guests take charge of their personal well-being," said Chris Coborn, Chairman, President & CEO of Coborn's, Inc. "quickClinics provide our guests with a convenient, quality health care option right in the grocery store. Through our partnership with CentraCare Health, we are excited to bring this unique service to two more communities.

The quickClinic offers treatment for common health care concerns including illnesses, skin conditions, minor injuries and a wide range of vaccinations, wellness screenings and physicals. The new clinic in Sauk Centre has a health care provider onsite, like the existing clinics in Waite Park and Foley. The new quickClinic in Sartell is considered a "virtual" location, with an RN on-site to help patients navigate a video visit with a provider located off-site. The virtual visits feature an innovative technology platform that allows the provider to see and hear patient symptoms through technology.

"We are using state-of-the-art technology to meet the needs of our patients. We believe the technology used at quickClinic Sartell will eventually become a standard of care for rural health care organizations across the country," said Brian Thieman, quickClinic Director at CentraCare Health. "Combining technology with medical expertise will allow us to meet the growing health care needs of our region."
